<sup>1</sup> The design, implementation and operation of an email pseudonym server

David Mazières, M. Frans Kaashoek  
November 1998, **Proceedings of the**

November 1998 **Proceedings of the 5th ACM conference on Computer and communications security**

**Publisher:** ACM Press

Full text available:  pdf(1.29 MB)

**Additional Information:** full citation, references, citings, index terms

<sup>2</sup> On secure and pseudonymous client-relationships with multiple servers

Eran Gabber, Phillip B. Gibbons, David M. Kristol, Yossi Matias, Alain Mayer

November 1999 **ACM Transactions on Information and System Security (TISSEC)**,

Volume 2 Issue 4

**Publisher:** ACM Press

Full text available:  pdf(161.56 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citings](#), [index terms](#), [review](#)

This paper introduces a cryptographic engine, Janus, which assists clients in establishing and maintaining secure and pseudonymous relationships with multiple servers. The setting is such that clients reside on a particular subnet (e.g., corporate intranet, ISP) and the servers reside anywhere on the Internet. The Janus engine allows each client-server relationship to use either weak or strong authentication on each interaction. At the same time, each interaction preserves privacy by neither ...

### **3 Unlinkable serial transactions: protocols and applications**

Stuart G. Stubblebine, Paul F. Syverson, David M. Goldschlag

November 1999 **ACM Transactions on Information and System Security (TISSEC)**,

Volume 2 Issue 4

**Publisher:** ACM Press

Full text available:  pdf(184.87 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citings](#), [index terms](#), [review](#)

We present a protocol for unlinkable serial transactions suitable for a variety of network-based subscription services. It is the first protocol to use cryptographic blinding to enable subscription services. The protocol prevents the service from tracking the behavior of its
